

# Association of mutations with all drugs

# Association of mutations with 17-AAG (Tanespimycin)

# Association of mutations with A-674563

# Association of mutations with ABT-737

Association of mutations with AT7519

# Association of mutations with AZD1480

# Association of mutations with Afatinib (BIBW-2992)

# Association of mutations with Alisertib (MLN8237)

# Association of mutations with Axitinib (AG-013736)

Association of mutations with BEZ235

# Association of mutations with BI-2536

# Association of mutations with BMS-345541

# Association of mutations with Barasertib (AZD1152-HQPA)

# Association of mutations with Bay 11-7085

# Association of mutations with Bortezomib (Velcade)

# Association of mutations with Bosutinib (SKI-606)

# Association of mutations with CHIR-99021

# Association of mutations with CI-1040 (PD184352)

Association of mutations with CYT387

Association of mutations with Cabozantinib

Association of mutations with Canertinib (CI-1033)

# Association of mutations with Cediranib (AZD2171)

Association of mutations with Crenolanib

Association of mutations with Crizotinib (PF-2341066)

Association of mutations with DBZ

# Association of mutations with Dasatinib

# Association of mutations with Doramapimod (BIRB 796)

# Association of mutations with Dovitinib (CHIR-258)

# Association of mutations with Elesclomol

Association of mutations with Entospletinib (GS-9973)

# Association of mutations with Entrectinib

# Association of mutations with Erlotinib

# Association of mutations with Flavopiridol

# Association of mutations with Foretinib (XL880)

Association of mutations with GDC-0879

Association of mutations with GDC-0941

# Association of mutations with GSK-1838705A

Association of mutations with GSK-1904529A

# Association of mutations with GSK690693

Association of mutations with GW-2580

Association of mutations with Gefitinib

# Association of mutations with Gilteritinib (ASP-2215)

# Association of mutations with Go6976

# Association of mutations with INK-128

# Association of mutations with Ibrutinib (PCI-32765)

# Association of mutations with Idelalisib

Association of mutations with Imatinib

# Association of mutations with JAK Inhibitor I

# Association of mutations with JNJ-28312141

# Association of mutations with JNJ-38877605

Association of mutations with JNJ-7706621

# Association of mutations with JQ1

# Association of mutations with KI20227

# Association of mutations with KU-55933

# Association of mutations with KW-2449

# Association of mutations with LY-333531

# Association of mutations with Lapatinib

# Association of mutations with Lenalidomide

# Association of mutations with Lenvatinib

# Association of mutations with Linifanib (ABT-869)

Association of mutations with Lovastatin

Association of mutations with MGCD-265

# Association of mutations with MK-2206

# Association of mutations with MLN120B

Association of mutations with MLN8054

# Association of mutations with Masitinib (AB-1010)

# Association of mutations with Midostaurin

# Association of mutations with Motesanib (AMG-706)

# Association of mutations with NF- $\kappa$ B Activation Inhibitor

# Association of mutations with NVP-ADW742

# Association of mutations with NVP-TAE684

# Association of mutations with Neratinib (HKI-272)

Association of mutations with Nilotinib

# Association of mutations with Nutlin 3a

# Association of mutations with PD173955

# Association of mutations with PHA-665752

Association of mutations with PHT-427

Association of mutations with PI-103

# Association of mutations with PLX-4720

# Association of mutations with PP242

Association of mutations with PRT062607

# Association of mutations with Palbociclib

# Association of mutations with Panobinostat

# Association of mutations with Pazopanib (GW786034)

# Association of mutations with Pelitinib (EKB-569)

# Association of mutations with Ponatinib (AP24534)

# Association of mutations with Quizartinib (AC220)

# Association of mutations with RAF265 (CHIR-265)

# Association of mutations with Rapamycin

# Association of mutations with Regorafenib (BAY 73-4506)

# Association of mutations with Roscovitine (CYC-202)

# Association of mutations with Ruxolitinib (INCB018424)

Association of mutations with S31-201

Association of mutations with SB-431542

# Association of mutations with SGX-523

# Association of mutations with SNS-032 (BMS-387032)

Association of mutations with SR9011

# Association of mutations with STO609

Association of mutations with SU11274

# Association of mutations with Saracatinib (AZD0530)

# Association of mutations with Selinexor

# Association of mutations with Selumetinib (AZD6244)

Association of mutations with Sorafenib

# Association of mutations with Staurosporine

Association of mutations with Sunitinib

# Association of mutations with TG100-115

# Association of mutations with Tandutinib (MLN518)

# Association of mutations with Tivozanib (AV-951)

# Association of mutations with Tofacitinib (CP-690550)

# Association of mutations with Tozasertib (VX-680)

# Association of mutations with Trametinib (GSK1120212)

Association of mutations with VX-745

# Association of mutations with Vandetanib (ZD6474)

Association of mutations with Vargetef

# Association of mutations with Vatalanib (PTK787)

# Association of mutations with Vemurafenib (PLX-4032)

# Association of mutations with Venetoclax

# Association of mutations with Vismodegib (GDC-0449)

# Association of mutations with Volasertib (BI-6727)

# Association of mutations with XAV-939

Association of mutations with YM-155

# Association of drugs with TET2:DNMT3A

# Association of drugs with NPM1:DNMT3A

# Association of drugs with WT1

# Association of drugs with FLT3

# Association of drugs with IDH2

# Association of drugs with DNMT3A

# Association of drugs with SF3B1

# Association of drugs with ASXL1

# Association of drugs with RUNX1

# Association of drugs with U2AF1

# Association of drugs with TET2

# Association of drugs with NPM1

# Association of drugs with IDH1

Association of drugs with SRSF2
